The Senator who still persists in talking about "withdrawing" Judge Robertson is the worst anachronism of our politics.

The royal wedding at Vienna was a brilliant beremonial, as royal weddings usually are, and was accompanied with the customary gifts to institutions and pardons of prisoners. These were made upon a generous scale. Complete or partial amnesty was granted to 331 prisoners, and thirty-two scholarships were founded at various schools.

Grant that the Senate has the right to consider nominations in any order it pleases. The President, if he has the right of selection at all, has the undisputed right to present his nomina selection would meet with opposition, he sent all the names to the Senate. If any part is to be disputed, he has a clear right to have the advice and consent of the Senate upon the disputed part first, in order to make such adjustment in regard to other offices as its decision may render advisable. When the Republican caucus resolved to defer to the last the nominations to which objection had been made, that course, with respect to the New-York nominations, was calculated to do the President great injustice. It tended to deprive him of all freedom of selection as to the other places, which he considered it important for public and party reasons to modify more or less according to the decision of the Senate upon the case in doubt. In reality, the course of the Senate would have deprived him of all advice as to the vital matter involved. Hence he has changed his order of mitted, upon which the advice and consent of the Senate is asked, has not been changed in the

That question, in its technical form as presented to the Senate, is simply this; Can the President appoint a man of undoubted ability and worth, to whom the Senator from New York makes personal objection? In effect, the Senate is called upon to decide whether the right of selection for the State of New-York belongs to the President or to Senator Conkline. In its broader partisan aspect, the question is, whether those who voted with the majority of the Republican party in the choice of a President shall be proscribed by those who voted with the minority. That question, too, stands before the Senate precisely as it did before other New-York nominations were withdrawn. When the Senate has performed its duty and given its advice on these questions, the Presilent will be able to determine what he ought to do with reference to other nominations. Until then, he is perfectly justifiable in awaiting the
